MOSTAFA SOLIMAN

React Native Developer

Cairo, Egypt | +20 112 835 6597 | m.fadaly52@gmail.com | linkedin.com/in/mostafa-soliman-fadali | github.com/mostafa-soliman

SUMMARY

React Native Developer currently building production cross-platform applications for the Saudi market using React Native, Expo, and TypeScript, including end-to-end subscription and payment workflows and Android/iOS build and deployment. Previous professional experience in native Android development with Kotlin, Jetpack Compose, and MVVM, along with web front-end experience using Angular and JavaScript. Skilled in API integration, reusable component architecture, React Hooks, and building clean, maintainable mobile applications within Agile teams.

SKILLS

React Native: React Native, Expo, Expo Router, TypeScript, JavaScript, React Hooks, React Context API, Custom Hooks, Reanimated, React Native SVG, RTL & Localization

Native Android: Kotlin, Java, Jetpack Compose, MVVM, MVI, Retrofit, Room Database, Clean Architecture

Web: HTML, CSS, Bootstrap, JavaScript, Angular, AngularJS

Tools & APIs: Git, GitHub, Azure DevOps, TFS, Postman, Swagger, OpenAPI, Firebase, Android Studio, RESTful APIs

Principles & Practices: SOLID, Clean Code, Dependency Injection, OOP, Asynchronous Programming, Manual / Functional Testing, Code Reviews, Agile/Scrum

EXPERIENCE

Mobile Application Developer (React Native) — Fodek

Nov 2025 – Present

Remote · Client: Saudi Arabia · Projects: FLOD Restaurant Platform & MacroHub

- Developed and maintained production cross-platform applications using React Native, Expo, and TypeScript for FLOD Restaurant Platform and MacroHub, serving the Saudi market.
- Built end-to-end subscription management flows, including Plan Selection, Package Details, Branch Selection, Starting Date, Payment Summary, Subscription Confirmation, My Plans, and Terms & Conditions.
- Implemented Freeze Subscription workflows, integrating frontend flows with backend APIs and business rules.
- Integrated RESTful APIs and collaborated with backend developers on data handling, validation, error handling, and consistent API contracts, using Git, Azure DevOps, OpenAPI, and Postman throughout the development lifecycle.
- Built reusable UI components and application flows using React Hooks, React Context API, custom hooks, Expo Router, Reanimated, and React Native SVG.
- Implemented localization and RTL support for the target market.
- Troubleshot and resolved API/networking issues, Expo/EAS build problems, and environment configuration challenges.
- Managed and delivered production releases for the FLOD mobile application on both Google Play and the Apple App Store, including Android/iOS build and deployment workflows.

Android Developer (Part-time) — Fodek

Aug 2025 – Nov 2025

Remote

- Contributed to native Android application development alongside full-time responsibilities, supporting mobile application development and maintenance.

Mobile Developer (Android) — BonianTech

Dec 2023 – Nov 2025

Cairo, Egypt · On-site

- Developed and maintained Android applications using Kotlin, Jetpack Compose, and MVVM architecture.
- Built Mini Market, an e-commerce Android application with product browsing, store management, inventory management, authentication, and purchasing workflows.
- Integrated RESTful APIs using Retrofit and implemented reliable data handling, authentication, and error management.
- Developed Hajj Platform, an educational Android application featuring lessons, videos, quizzes, and user progress tracking.
- Built responsive and reusable user interfaces using Jetpack Compose, following modern Android development practices.

- Applied Clean Architecture, dependency injection, SOLID principles, and reusable components to improve code maintainability.
- Participated in code reviews, debugging, testing, and troubleshooting throughout the application development lifecycle.

Frontend / Web Developer — BonianTech *Oct 2023 – Dec 2023*

Cairo, Egypt · On-site

- Enhanced and debugged the Prophets Call website using HTML, CSS, and AngularJS, improving functionality and user experience.
- Collaborated with cross-functional teams to align web development with business goals.
- Conducted cross-browser testing and resolved compatibility issues, ensuring a consistent experience across devices.

PROJECTS

FLOD Restaurant Platform & MacroHub — React Native, Expo, TypeScript | Fodek | Nov 2025 – Present

- Production cross-platform mobile applications serving the Saudi market, including restaurant management, subscriptions, payments, and related business workflows.
- FLOD recorded 8K+ first-time iOS downloads in the last 90 days.

Live: Google Play | App Store

Mini Market – Android App — Kotlin, MVVM, Retrofit | BonianTech | Jan 2024 – Nov 2024

- Android e-commerce application with store management, inventory, authentication, product browsing, and purchasing workflows.

Hajj Platform – Educational App — Kotlin, MVVM, Retrofit | BonianTech | Apr 2024 – Sep 2024

- Educational Android application featuring Hajj lessons, videos, quizzes, and progress tracking.

EDUCATION

Bachelor of Engineering – Computer and Systems Engineering *2014 – 2021*

Zagazig University, Zagazig, Egypt

LANGUAGES

Arabic — Native

English — Proficient
